

TURFPAIN.NET

Getting a green lawn is easy:

- ★ Inexpensive & Long-lasting
- ★ Realistic Green Color
- ★ Natural Look & Feel
- ★ Green to Green Transition
- ★ Environmentally Responsible

Endurant lawn paint will save you time and money on lawn maintenance and lawn repair.

Endurant turf paint is the professional's choice in lawn colorant due to its natural color. Lawn paint gives the wow factor to your lawn, particularly in times of winter dormancy, drought, listing a property for sale or instead of overseeding.

Nobody wants brown grass! So get rid of it in minutes with environmentally friendly yard paint that can last as long as three months, while improving soil and plant health.

Our Colorants

ENDURANT TURF COLORANT

The regular classic green grass lawn colorant for vibrant, lush green grass with a natural appeal suitable for matching the wide range of grass varieties.

ENDURANT PREMIUM

As green as it gets. A deep, rich green grass paint that some refer to as Super Green because your lawn is about to be the best on the block. Ultra-concentrated lawn colorant.

Concentrate

ENDURANT^{PR} PERENNIAL RYE

An ultra-concentration of green grass lawn colorant that is reminiscent of the healthiest, juiciest green limes. Similar to actively growing Perennial Rye Grass.

Concentrate

ENDURANT^{FW} FAIRWAY

Looking out at your lawn is like looking at a forest green fairway. You just want to keep looking at it. Super concentrated lawn colorant for a plush green lawn.

Concentrate

Application considerations for Endurant lawn colorant:

- ★ Mow actively growing grass prior to painting to avoid cutting off the colorant once applied.
- ★ Remove any debris from lawn.
- ★ Check that rain or snow is not in the forecast for at least 8 hours.
- ★ Avoid spraying in windy conditions.
- ★ Apply to dry grass or a damp lawn. Painting in early morning with dew present can produce great results, but is not necessary.
- ★ Read all label instructions.
- ★ Cover or mask off any areas to prevent overspray on pavers, sidewalks or other edge materials. Wear gloves and clothes you do not mind staining with colorant just in case. Endurant lawn colorant is non-toxic.
- ★ Mix well in a handheld garden sprayer for small and average-sized lawns or a backpack sprayer for larger lawn areas. Sprayers are available at hardware stores.
- ★ Mix Endurant lawn colorant for the desired shade and following label guidelines.
- ★ Work backwards to avoid stepping on wet paint.
- ★ Use a fine mist setting to reduce waste and promote even coverage.
- ★ Apply in more than one direction to prevent streaking and provide optimal even coverage.
- ★ If accidental overspray occurs, immediately clean the area. A window cleaner or wire brush may help remove tough stains if necessary.
- ★ Endurant lawn colorant will dry in about 60 minutes depending on weather. For best results wait an hour to two hours after spraying before walking on the grass to prevent tracking. If heavy use, such as athletic use, waiting at least two hours is best.
- ★ Endurant lawn colorant will last up to approximately 3 months depending on the growth rate, frequency of mowing and weather conditions.
- ★ Endurant lawn colorant can be used on dormant turf grass that is brown due to the season, but is still alive. Endurant lawn colorant can also be used on actively growing grass, brown grass, drought-stricken grass, pet urine stains, patchy brown lawns, dry grass or anywhere optimal natural green grass color is desired.
- ★ Reapply as needed and desired.

Directions for applying Endurant Turf colorant:

- 1

Shake or stir Endurant Turf Colorant well before using.
 
- 2

For home lawns, mix 16 oz of Endurant Turf Colorant with 2 gallons of water in your household garden sprayer. This will cover 500 to 600 sq. ft.
- 3

Mix/shake well.
 
- 4

Spray mixture onto your lawn, carefully avoiding concrete areas, pavers, fences and plant material.
 
- 5

Let dry for two hours.
